EUREKA RESOURCES INC.

Condensed Interim Consolidated Financial Statements

April 30, 2017

(Expressed in Canadian Dollars)

(Unaudited – Prepared by Management)

NOTICE OF NO AUDITOR REVIEW OF INTERIM FINANCIAL STATEMENTS

Under National Instrument 51-102, if an auditor has not performed a review of the interim financial statements; they must be accompanied by a notice indicating that the financial statements have not been reviewed by an auditor.

The accompanying condensed interim consolidated financial statements have been prepared by and are the responsibility of the Company's management. The Company's independent auditor has not performed a review of these financial statements in accordance with the standards established by the Canadian Institute of Chartered Professional Accountants for a review of interim financial statements by an entity's auditor.

(Expressed in Canadian Dollars)

1. CORPORATE INFORMATION

Eureka Resources Inc. (the "Company") was incorporated under the laws of the Province of British Columbia, Canada on June 16, 1981. Eureka Minerals (USA) Inc. was incorporated under the laws of the State of Nevada, USA on June 23, 2016.

The Company's business is the acquisition, exploration and evaluation of mineral properties located in the Province of British Columbia, Canada, in the Yukon Territory, Canada and in the State of Nevada, USA. The Company's common shares are listed for trading on the TSX Venture Exchange ("TSX-V") under the symbol "EUK". The Company's head office is Suite 1100 - 1111 Melville Street, Vancouver, British Columbia, Canada V6E 3V6.

2. BASIS OF PREPARATION

Statement of Compliance

These condensed interim consolidated financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB") and in accordance with International Accounting Standard ("IAS") IAS 34 "Interim Financial Reporting".

These condensed interim consolidated financial statements do not include all of the information and disclosures required to be included in annual financial statements prepared in accordance with IFRS. These condensed interim consolidated financial statements should be read in conjunction with the Company's audited annual financial statements for the years ended October 31, 2016 and 2015.

These condensed interim consolidated financial statements were authorized for issue on June 29, 2017 by the directors of the Company.

Going Concern

These condensed interim consolidated financial statements are prepared using IFRS applicable to a going concern, which contemplates the Company will continue in operations for the foreseeable future and will be able to realize its assets and discharge its liabilities in the normal course of business. Future operations are dependent on the Company's ability to raise additional equity financing and the attainment of profitable operations.

The Company has a history of operating losses and at April 30, 2017, has an accumulated deficit of $6,841,120. At April 30, 2017, the Company had working capital of $74,803. The Company will require additional equity financings in order to continue exploration of its exploration and evaluation assets and fund its administrative operations, but believes that it can maintain operations for the next twelve months.

These condensed interim consolidated financial statements do not include any adjustments relating to the recoverability and classification of recorded asset amounts and classification of liabilities that might be necessary should the Company be unable to continue as a going concern. These conditions may cast significant doubt about the Company's ability to continue as a going concern.

Principles of Consolidation

These consolidated financial statements incorporate the accounts of the Company and the following subsidiary:

Name of subsidiary	Country of Incorporation	Percentage ownership	Principal Activity
Eureka Minerals (USA) Inc.	USA	100%	Exploration of Mineral Properties

The Company consolidates the subsidiary on the basis that it controls the subsidiary through its ability to govern its financial and operating policies. All intercompany balances and transactions have been eliminated on consolidation.

2. BASIS OF PREPARATION (cont'd…)

Basis of Measurement

These condensed interim consolidated financial statements have been prepared on a historical cost basis, except for financial instruments classified as financial instruments as fair value through profit and loss, which are stated at their fair value. In addition, these financial statements have been prepared using the accrual basis of accounting except for cash flow information. All dollar amounts are expressed in Canadian dollars unless otherwise specified.

Critical Accounting Judgments, Estimates and Assumptions

Critical Judgments

The preparation of these condensed interim consolidated financial statements requires the Company to make judgments regarding the going concern of the Company as discussed in Note 2.

Estimations and assumptions

Significant assumptions about the future and other sources of estimation uncertainty that management has made at the end of the reporting period, that could result in a material adjustment to the carrying amounts of assets and liabilities in the event that actual results differ from assumptions made, relate to, but are not limited to, the following:

i) Exploration and Evaluation Assets

The carrying amount of the Company's exploration and evaluation assets properties does not necessarily represent present or future values, and the Company's exploration and evaluation assets have been accounted for under the assumption that the carrying amount will be recoverable. Recoverability is dependent on various factors, including the discovery of economically recoverable reserves, the ability of the Company to obtain the necessary financing to complete the development and upon future profitable production or proceeds from the disposition of the mineral properties themselves. Additionally, there are numerous geological, economic, environmental and regulatory factors and uncertainties that could impact management's assessment as to the overall viability of its properties or to the ability to generate future cash flows necessary to cover or exceed the carrying value of the Company's exploration and evaluation assets.

ii) Share-based Payments

The estimation of share-based payments includes estimating the inputs used in calculating the fair value for share-based payments expense included in profit or loss and share-based share issuance costs included in equity. Share-based payments expense and share-based share issuance costs are estimated using the Black-Scholes options-pricing model as measured on the grant date to estimate the fair value of stock options. This model involves the input of highly subjective assumptions, including the expected price volatility of the Company's common shares, the expected life of the options, and the estimated forfeiture rate.

iii) Income Taxes

The estimation of income taxes includes evaluating the recoverability of deferred tax assets based on an assessment of the Company's ability to utilize the underlying future tax deductions against future taxable income prior to expiry of those deductions. Management assesses whether it is probable that some or all of the deferred income tax assets will not be realized. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable income, which in turn is dependent upon the successful discovery, extraction, development and commercialization of mineral reserves. To the extent that management's assessment of the Company's ability to utilize future tax deductions changes, the Company would be required to recognize more or fewer deferred tax assets, and future income tax provisions or recoveries could be affected.

3. SIGNIFICANT ACCOUNTING POLICIES

Exploration and Evaluation Assets

All expenditures related to the cost of exploration and evaluation of mineral resources including acquisition costs for interests in mineral claims are capitalized as exploration and evaluation assets and are classified as intangible assets. General exploration costs not related to specific mineral properties or incurred prior to acquisition are expensed as incurred. If economically recoverable reserves are developed, capitalized costs of the related property are reclassified as mining assets and upon commencement of commercial production, are amortized using the units of production method over estimated recoverable reserves. Impairment is assessed at the level of cash-generating units.

Exploration and evaluation assets are regularly reviewed for impairment or whenever events or changes in circumstances indicate that the carrying amount may exceed its recoverable amount. When an impairment review is undertaken, the recoverable amount is assessed by reference to the higher of a value in use (being the present value of expected future cash flows of the relevant cash generating unit) and fair value less costs to sell. If the carrying amount of an asset exceeds the recoverable amount an impairment charge is recognized by the amount by which the carrying amount of the asset exceeds the fair value of the asset. Impairment of a property is generally considered to have occurred if one of the following factors are present; the rights to explore have expired or are near to expiry with no expectation of renewal, no further substantive expenditures are planned or budgeted, exploration and evaluation work is discontinued in an area for which commercially viable quantities have not been discovered, and indications exist that development in a specific area is likely to proceed, but the carrying amount is unlikely to be recovered in full by development or sale.

The Company has not yet determined whether or not any of its exploration and evaluation assets contain economically recoverable reserves. Amounts capitalized to exploration and evaluation assets do not necessarily reflect present or future values.

Decommissioning and Restoration Provisions

The Company recognizes liabilities for legal or constructive obligations associated with the retirement of exploration and evaluation assets and equipment. The net present value of future rehabilitation costs is capitalized to the related asset along with a corresponding increase in the rehabilitation provision in the period incurred. Discount rates using a pre-tax rate that reflect the time value of money are used to calculate the net present value.

The Company's estimates of reclamation costs could change as a result of changes in regulatory requirements, discount rates and assumptions regarding the amount and timing of the future expenditures. These changes are recorded directly to the related assets with a corresponding entry to the rehabilitation provision. The increase in the provision due to the passage of time is recognized as interest expense.

The Company had no decommissioning liabilities as at April 30, 2017 and October 31, 2016.

3. SIGNIFICANT ACCOUNTING POLICIES (cont'd...)

Foreign Currency Translation

The functional currency is the currency of the primary economic environment in which the entity operates and has been determined for each entity within the Company. The functional currency of the Company is the Canadian dollar and the functional currency of Eureka Minerals (USA) Inc. is the United States dollar. The functional currency determinations were conducted through an analysis of the consideration factors identified in IAS 21.

i) Transactions and Balances

Foreign currency transactions are translated into the relevant functional currency using the exchange rates prevailing at the dates of the transactions. At the end of each reporting period, the monetary assets and liabilities of the Company that are determined in foreign amounts are translated at the rate of exchange at the date of the statement of financial position. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at period-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognized in the statement of loss.

ii) Translation of Subsidiary Results into the Presentation Currency

The Company's presentation currency is in the Canadian dollar.

The results and statements of financial position of the Company's subsidiary with a functional currency that is different from the presentation currency are translated into the presentation currency as follows:

- Assets and liabilities are translated at the period end rates of exchange, the results of operations are translated at average rates of exchange for the period, and items of equity are translated at historical rates. The resulting changes are recognized in accumulated other comprehensive income ("AOCI") in equity as a foreign currency translation adjustment.

3. SIGNIFICANT ACCOUNTING POLICIES (cont'd...)

Share-based Payments

The stock option plan allows Company employees, directors and consultants to acquire shares of the Company. The fair value of options granted is recognized as a share-based payments expense with a corresponding increase in equity. An individual is classified as an employee when the individual is an employee for legal or tax purposes (direct employee) or provides services similar to those performed by a direct employee. Consideration paid on the exercise of stock options is credited to share capital and the fair value of the options is reclassified from contributed reserves to share capital.

The fair value is measured at grant date and each tranche is recognized over the period during which the options vest. The fair value of the options granted is measured using the Black-Scholes Option Pricing Model which takes into consideration the terms and conditions upon which the options were granted. At each financial position reporting date, the amount recognized as an expense is adjusted to reflect the number of stock options that are expected to vest.

In situations where equity instruments are issued to non-employees and some or all of the goods or services received by the entity as consideration cannot be specifically identified, they are measured at fair value of the share-based payment. Otherwise, share-based payments are measured at the fair value of goods or services received.

Income Taxes

Current tax is the expected tax payable or receivable on the local taxable income or loss for the year, using local tax rates enacted or substantively enacted at the financial position reporting date, and includes any adjustments to tax payable or receivable in respect of previous periods.

Deferred income taxes are recognized in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Deferred tax is measured at the tax rates that are expected to be applied to temporary differences when they reverse, based on the laws that have been enacted or substantively enacted by the financial position reporting date. Deferred tax is not recognized for temporary differences which arise on the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting, nor taxable profit or loss.

A deferred tax asset is recognized for unused tax losses, tax credits and deductible temporary differences, to the extent that it is probable that future taxable profits will be available against which they can be utilized. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realized.

Flow-through shares

Canadian income tax legislation permits an enterprise to issue securities referred to as flow-through shares, whereby the investor can claim the tax deductions arising from the renunciation of the related resource expenditures. The Company accounts for flow-through shares whereby the premium paid for the flow-through shares in excess of the market value of the shares without flow-through features at the time of issue is credited to other liabilities and included in income tax recovery at the same time the qualifying expenditures are made.

Loss Per Share

The Company presents basic and diluted loss per share data for its common shares, calculated by dividing the loss attributable to common shareholders of the Company by the weighted average number of common shares outstanding during the period. Diluted loss per share does not adjust the loss attributable to common shareholders or the weighted average number of common shares outstanding when the effect is anti-dilutive.

3. SIGNIFICANT ACCOUNTING POLICIES (cont'd...)

Financial Instruments

<u>Financial Assets</u>

All financial assets are initially recorded at fair value and designated upon inception into one of the following four categories: held to maturity, available for sale, loans and receivables or at fair value through profit or loss ("FVTPL").

Financial assets classified as FVTPL are measured at fair value with unrealized gains and losses recognized through profit or loss. The Company's cash and marketable securities are classified as FVTPL.

Financial assets classified as loans and receivables and held to maturity assets are measured at amortized cost. The Company's GST receivable and BCMETC receivable are classified as loans and receivables. Financial assets classified as available for sale are measured at fair value with unrealized gains and losses recognized in other comprehensive income and loss except for losses in value that are considered other than temporary which are recognized in profit or loss. As at April 30, 2017 and October 31, 2016, the Company has not classified any financial assets as available for sale. The Company classifies its reclamation bonds as held to maturity.

Transaction costs associated with FVTPL financial assets are expensed as incurred, while transaction costs associated with all other financial assets are included in the initial carrying amount of the asset.

At each reporting date, the Company assesses whether there is objective evidence that a financial asset is impaired. If such evidence exists, the Company recognizes an impairment loss as follows:

a) Financial assets carried at amortized cost: The loss is the difference between the amortized cost of the asset and the present value of the estimated future cash flows, discounted using the instrument's original effective interest rate. The carrying amount of the asset is reduced by this amount either directly or indirectly through the use of an allowance account.

b) Available-for-sale financial assets: The impairment loss is the difference between the original cost of the asset and its fair value at the measurement date, less any impairment losses previously recognized in the statement of loss and comprehensive loss. This amount represents the cumulative loss in accumulated other comprehensive income that is reclassified to the statement of loss and comprehensive loss.

<u>Financial Liabilities</u>

All financial liabilities are initially recorded at fair value and designated upon inception as FVTPL or other financial liabilities.

Financial liabilities classified as other financial liabilities are initially recognized at fair value less directly attributable transaction costs. After initial recognition, other financial liabilities are subsequently measured at amortized cost using the effective interest rate method. The effective interest rate method is a method of calculating the amortized cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that discounts estimated future cash payments through the expected life of the financial liability, or, where appropriate, a shorter period. The Company's accounts payable and accrued liabilities and due to related parties are classified as other financial liabilities.

Financial liabilities classified as FVTPL include financial liabilities held for trading and financial liabilities designated upon initial recognition as FVTPL. Derivatives, including separated embedded derivatives are also classified as held for trading and recognized at fair value with changes in fair value recognized in profit or loss unless they are designated as effective hedging instruments. Fair value changes on financial liabilities classified as FVTPL are recognized in profit or loss.

3. SIGNIFICANT ACCOUNTING POLICIES (cont'd…)

Impairment of non-financial assets

At the end of each reporting period the carrying amounts of the Company's assets are reviewed to determine whether there is any indication that those assets may be impaired. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment, if any. The recoverable amount is the higher of fair value less costs to sell and value in use. Fair value is determined as the amount that would be obtained from the sale of the asset in an arm's length transaction between knowledgeable and willing parties. In assessing value in use, the estimated future cash flows are discounted to their present value using a discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. If the recoverable amount of an asset is estimated to be less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount and the impairment loss is recognized in profit or loss for the period. For an asset that does not generate largely independent cash inflows, the recoverable amount is determined for the cash generating unit to which the asset belongs. Following the recognition of an impairment loss, the depreciation charge applicable to the asset is adjusted prospectively in order to systematically allocate the revised carrying amount, net of any residual value, over the remaining useful life.

Where an impairment subsequently reverses, the carrying amount of the asset (or cash generating unit) is increased to the revised estimate and its recoverable amount, but to an amount that does not exceed the carrying amount that would have been determined had no impairment loss been recognized for the asset (or cash generating unit) in prior years. A reversal of an impairment loss is recognized immediately in profit or loss.

Share Capital

Common shares are classified as equity. Incremental costs directly attributable to the issue of common shares and stock options are recognized as a deduction from equity. Common shares issued for consideration other than cash, are valued based on their market value at the date the shares are issued.

The Company has adopted a residual value method with respect to the measurement of warrants attached to private placement units. The residual value method first allocates value to the more easily measurable component based on fair value and then the residual value, if any, to the less easily measurable component. The Company considers the fair value of common shares issued in the private placements to be the more easily measurable component and the common shares are valued at their fair value, as determined by the closing market price on the announcement date. The balance, if any, is allocated to the attached warrants. Any fair value attributed to the warrants is recorded as contributed reserves.

New Standards Adopted For the Year Ended October 31, 2016

Effective November 1, 2015, the following standards were adopted but did not have a material impact on the financial statements.

- IFRS 7 Amended to require additional disclosures on transition from IAS 39 and IFRS 9

(Expressed in Canadian Dollars)

3. SIGNIFICANT ACCOUNTING POLICIES (cont'd…)

New Standards and Interpretations Not Yet Adopted

Certain new standards, interpretations, amendments and improvements to existing standards were issued by the IASB or IFRIC that are mandatory for future accounting periods. The following have not yet been adopted by the Company and are being evaluated to determine their impact.

a) IFRS 15 - New standard to establish principles for reporting the nature, amount, timing, and uncertainty of revenue and cash flows arising from an entity's contracts with customers, effective for annual periods beginning on or after January 1, 2017.

b) IFRS 9 – New standard that replaced IAS 39 for classification and measurement, effective for annual periods beginning on or after January 1, 2018.

c) IFRS 16 – Leases: New standard to establish principles for recognition, measurement, presentation and disclosure of leases with an impact on lessee accounting, effective for annual periods beginning on or after January 1, 2019.

4. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT

Financial instruments measured at fair value are classified into three levels in the fair value hierarchy according to the relative reliability of the inputs used to estimate the fair values. The three levels of the fair value hierarchy are:

Level 1 – Unadjusted quoted prices in active markets for identical assets or liabilities;
Level 2 – Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly; and
Level 3 – Inputs that are not based on observable market data.

The fair values of the Company's receivables, accounts payable and accrued liabilities and due to related parties approximate their carrying values because of the short-term nature of these instruments. The fair value of the Company's reclamation bonds also approximates its carrying value. The following table illustrates the classification of the Company's financial instruments within the fair value hierarchy as at April 30, 2017 and October 31, 2016:

	Level 1	Level 2	Level 3
April 30, 2017:			
Cash	$ 57,865	$ -	$ -
Marketable securities	$ -	$ -	$ -
October 31, 2016:			
Cash	$ 392,664	$ -	$ -
Marketable securities	$ 28,750	$ -	$ -

The Company's risk exposures and the impact on the Company's financial instruments are summarized below:

Credit risk

The Company's cash is held with large financial institutions. The Company's receivables consist of sales taxes and exploration tax credits receivable from the Government of Canada and the Government of British Columbia. Management believes that credit risk concentration with respect to cash and receivables is remote.

Liquidity risk

The Company's approach to managing liquidity risk is to ensure that it will have sufficient liquidity to meet liabilities when due. As at April 30, 2017, the Company had cash of $57,865 to settle current liabilities of $49,331. Management believes the Company has sufficient funds to meet its current liabilities when they become due. See going concern discussion in Note 2.

4. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (cont'd...)

Market risk

Market risk is the risk of loss that may arise from changes in market factors such as interest rates, and commodity and equity prices.

a) Interest rate risk

The Company has cash which is not subject to significant risks in fluctuating interest rates. The Company's current policy is to invest excess cash in investment-grade short-term deposit certificates issued by its banking institutions. The Company periodically monitors the investments it makes and is satisfied with the credit ratings of its banks. An increase to interest rates by 1% would have an insignificant effect on the Company's operations.

b) Price risk

The Company is exposed to price risk with respect to commodity and equity prices. Equity price risk is defined as the potential adverse impact on the Company's earnings due to movements in individual equity prices or general movements in the level of the stock market. The Company's marketable securities are subject to price risk. Commodity price risk is defined as the potential adverse impact on earnings and economic value due to commodity price movements and volatilities. The Company closely monitors commodity prices of gold, individual equity movements, and the stock market to determine the appropriate course of action to be taken by the Company.

c) Foreign currency risk

The Company is exposed to foreign currency risk on fluctuations related to cash denominated in US dollars. As at April 30, 2017 and October 31, 2016 a 10% fluctuation in the US Dollar against the Canadian Dollar would not have a significant impact on profit and loss.

5. MARKETABLE SECURITIES

	April 30, 2017	October 31, 2016
Fair value, beginning	$ 28,750	$ -
Acquisitions (non-cash) (Note 6)	-	25,000
Proceeds on sale	(25,990)	
Unrealized gain (loss)	(3,750)	3,750
Realized gain on sale	990	
Fair value, ending	$ -	$ 28,750

The fair value of the Company's marketable securities is measured at each reporting date by reference to the closing price of the shares.

(Expressed in Canadian Dollars)

6. EXPLORATION AND EVALUATION ASSETS

FG Gold Project:

The Company holds a 100% interest in 33 contiguous claims comprising the FG Gold Project area. The claims are located in the Cariboo Mining Division, British Columbia.

i. Under the terms of a Settlement Agreement in which a dispute between the Company and a former optionee of the property was settled, the Company must issue 200,000 common shares to the former optionee owners upon completion of a positive feasibility study;

ii. In addition, the Company must issue 210,000 common shares to a former director in consideration for exploration work done on the property, as follows:

Upon completion of feasibility study recommending production	70,000
Upon commencement of production	70,000
Upon repayment of pre-production capital costs	70,000

iii. The property is subject to a 3% net smelter return royalty (“NSR”) which becomes payable after the capital required to bring the property into commercial production is recovered from production. The NSR is limited to a maximum of $2,600,000 with an allowance for the change in the Consumer Price Index from September 22, 1989 to the date the royalty becomes payable.

Canarc Resource Corp (“Canarc”) Option Agreement

On August 24, 2016, the Company entered into an option agreement with Canarc which provided Canarc the option to earn up to a 75% interest in the FG Property.

Canarc issued the Company 250,000 common shares with a fair value of $25,000 (Note 5) and purchased 750,000 units of the Company at $0.14 per unit for $105,000.

In order to earn the initial 51% interest in the FG Property, Canarc is required to:

(a) Incur aggregate exploration expenditures of $1,500,000 on the property as follows:

- at least $500,000 is to be incurred in calendar 2017,
- at least $500,000 is to be incurred in calendar 2018, and
- the balance of the $1,500,000 is to be incurred in calendar 2019.

(b) Issue shares to the Company as set out below:

Payment Date	Number of Shares
First Anniversary	250,000
Second Anniversary	250,000
Third Anniversary	250,000

(c) Pay the Company an annual cash payment equal to 50% of the British Columbia Mining Exploration Tax Credit received by Canarc for expenditures incurred by Canarc on the FG Property (to an aggregate maximum of $1,500,000 in expenditures during the first option period) each year of the first option period.

(Expressed in Canadian Dollars)

6. EXPLORATION AND EVALUATION ASSETS (cont'd...)

FG Gold Project: (cont'd...)

Canarc Resource Corp ("Canarc") Option Agreement (cont'd...)

In order to earn an additional 24% interest in the FG Property, Canarc is required to:

(a) Incur additional exploration expenditures of $1,500,000 on the property between the third anniversary and the fifth anniversary of the date of grant of the option.

(b) Issue shares to the Company as set out below:

Payment Date	Number of Shares
Fourth Anniversary	750,000
Fifth Anniversary	750,000

(c) Pay the Company an annual cash payment equal to the greater of: (i) $75,000 and (ii) 50% of the British Columbia Mining Exploration Tax Credit for expenditures incurred by Canarc on the FG Property (to an aggregate maximum of $1,500,000 in expenditures during the second option period) each year of the second option period.

Upon exercise of the option by Canarc, the companies will form a joint venture with respect to the FG Property.

Gemini Lithium Project:

On January 20, 2016, the Company entered into an interim agreement with Nevada Sunrise Gold Corporation ("Nevada Sunrise"), a public company with directors and officers in common with the Company, to acquire a 50% participating interest in the Gemini Lithium Project ("Gemini") located in the Lida Valley, Esmeralda County, Nevada, USA.

Pursuant to the terms of the interim agreement, the Company had the right to acquire a 50% participating interest in Gemini by reimbursing Nevada Sunrise for 50% of the Gemini acquisition and evaluation costs. In addition, the Company would issue Nevada Sunrise 500,000 common shares as a prospect fee, with 300,000 shares to be issued on receipt of regulatory acceptance of the agreement and 200,000 to be issued on the first anniversary of such acceptance. The Company and Nevada Sunrise would enter into a joint venture on Gemini with Nevada Sunrise acting as operator of exploration in exchange for a 10% management fee to be charged to the joint venture. The interim agreement was subject to the satisfaction of certain conditions and approvals all of which were met. The agreement was a non-arm's length transaction under TSXV policies. The non-independent directors abstained from voting on the agreement.

On May 4, 2016, the companies signed an addendum to the interim agreement in which they agreed that the companies had completed their due diligence review on Gemini, that a definitive joint venture agreement would be entered into (signed on September 21, 2016) and that in the event that one of the companies divests of its 50% interest in Gemini, the remaining company would become the operator at Gemini by default. The Company paid Nevada Sunrise 50% of the acquisition and evaluation costs.

On June 6, 2016, the companies received TSXV acceptance of the interim agreement and the addendum and the Company issued 300,000 common shares with a fair value of $28,500 to Nevada Sunrise.

On May 2, 2017, Nevada Sunrise divested its 50% interest in Gemini, and consequently the Company became the operator of the Gemini project. The company's new joint venture partner is Advantage Lithium Corp.

On June 6, 2017, the Company issued 200,000 common shares with a fair value of $11,000 to Nevada Sunrise.

6. EXPLORATION AND EVALUATION ASSETS (cont'd...)

Gold Creek Project:

On November 14, 2016, the Company entered into an option agreement under which the Company was granted the option to earn up to a 100% interest in the Gold Creek Project, located in the Cariboo Mining Division, British Columbia.

Under the terms of the agreement, the Company can earn up to a 100% interest in the Gold Creek Project in three stages:

- 49% by incurring a minimum of $30,000 in exploration expenditures by November 14, 2016 (incurred);

- an additional 26%, by issuing 50,000 common shares and incurring an additional $50,000 in exploration expenditures by August 31, 2017;

- an additional 25% by issuing an additional 100,000 common shares and incurring an additional $50,000 in exploration expenditures by August 31, 2018.

If the interest earned by the Company is less than 100%, a joint venture shall be formed to further explore the Gold Creek Project. The vendor retained a 1% net smelter royalty of which the Company may purchase 0.5% for $1,000,000.

Luxor Gold Project:

On December 12, 2016, the Company entered into a purchase agreement in which the Company purchased a 100% interest in three non-contiguous claim blocks covering 360 claims and known as the Luxor Project located in the Dawson Range Gold Belt, Yukon Territory.

On January 3, 2017, the Company issued 2,500,000 common shares to the vendors. The vendors have agreed to an arrangement under which the shares will become free trading as follows:

- June 28, 2017 833,334 shares;
- December 28, 2017: 833,334 shares;
- June 28, 2018: 833,332 shares.

In addition, the Company issued 125,000 common shares as a finder's fee.

Commitment:

The Company has committed to use the vendors to perform exploration work on the properties totaling $750,000 over four years as follows:

- $187,500 on or before December 28, 2017;
- $187,500 on or before December 28, 2018;
- $187,500 on or before December 28, 2019;
- $187,500 on or before December 28, 2020;

The vendors will retain a 2% net smelter return royalty on the properties. The Company may purchase the royalty for $1,000,000.

(Expressed in Canadian Dollars)

6. EXPLORATION AND EVALUATION ASSETS (cont'd...)

Tak Gold Project:

On January 9, 2017, the Company entered into a purchase agreement in which the Company purchased a 100% interest in 82 claims known as the Tak Project located in the Dawson Range Gold Belt, Yukon Territory.

On February 6, 2017, the Company issued 500,000 common shares with a fair value of $50,000 as consideration for the purchase. The vendors have agreed to an arrangement under which the shares will become free trading as follows:

- On closing 125,000 shares
- Six months from closing 125,000 shares
- Twelve months from closing 125,000 shares
- Eighteen months from closing 125,000 shares

The vendors will retain a 2% net smelter return royalty on the property. The Company may purchase 1% for $1,000,000.

CKN Project:

On April 5, 2017, the Company entered into an option agreement to earn a 100% interest in 2 claims covering 1,356 hectares known as the CKN Project, located in the Cariboo Mining Division, British Columbia.

To earn the 100% interest, the Company must make the following cash and share payments to the vendor, and incur the following minimum exploration expenditures:

Due Date	Cash	Common Shares	Exploration Expenditures
Closing Date	$15,000 (paid)	50,000 (issued)	$Nil
On or before July 1, 2018	$20,000	100,000	$40,000
On or before July 1, 2019	$30,000	100,000	$80,000
On or before July 1, 2020	$50,000	200,000	$100,000
On or before July 1, 2021	$100,000	250,000	$Nil

The vendor will retain a 2% net smelter return royalty on the property. The Company has the right to purchase 1% of the royalty for $1,000,000 any time prior to commercial production.

On April 21, 2017, the Company received TSXV acceptance of the option agreement issued 50,000 common shares with a fair value of $4,750.

Subsequent to April 30, 2017, the Company staked two additional contiguous claims covering 491 hectares bringing the total claim block to 1,847 hectares.

7. RECLAMATION BONDS

The Company has placed reclamation bonds totaling $15,000 in interest bearing term deposits which are pledged to the Province of British Columbia as security for reclamation obligations under the mining regulations in the Province of British Columbia. The Company placed a $12,440 (US$9,108) reclamation bond with the Bureau of Land Management in the State of Nevada as security for reclamation obligations under mining regulations in the State of Nevada.

8. SHARE CAPITAL

a) Authorized:

Unlimited number of common shares without par value

b) Issued:

On April 30, 2017, there were 38,834,472 common shares issued and outstanding.

Six Months Ended April 30, 2017:

Private Placement

On December 29, 2016, the Company issued 707,000 common shares pursuant to the private placement of 707,000 flow-through units at $0.10 per unit for gross proceeds of $70,700. Each unit contained one flow-through common share and one-half of one share purchase warrant. Each full warrant entitled the holder to purchase an additional common share at $0.15 per share until December 29, 2018.

In connection with the private placement, the Company paid finder's fees of $1,992 and issued 19,920 finder's warrants. Each finder's warrant entitled the holder to purchase one non-flow-through unit with the same terms as the private placement units at $0.10 per unit until December 29, 2018.

All share purchase warrants issued, including those issued as finders' fees, are subject to an acceleration clause, which will cause the warrants, if unexercised, to expire on the date which is 30 days after the date that the volume-weighted average trading price of the Company's common shares on the TSXV exceeds $0.25 per share over a period of ten consecutive trading days.

Luxor Acquisition

On January 3, 2017, the Company issued 2,625,000 common shares with a fair value of $275,625 to acquire a 100% interest in the Luxor Project.

Finder's Warrants Exercised

On January 20, 2017, the Company issued 38,500 common shares and 38,500 warrants exercisable at $0.125 per share until April 29, 2018 pursuant to the exercise of 38,500 finder's warrants at $0.075 for proceeds of $2,888.

Tak Acquisition

On February 6, 2017, the Company issued 500,000 common shares with a fair value of $50,000 to acquire a 100% interest in the Tak Project.

CKN Option Payment

On April 21, 2017, the Company issued 50,000 common shares with a fair value of $4,750 as an option payment on the CKN Project.

(Expressed in Canadian Dollars)

8. SHARE CAPITAL (cont'd)

b) Issued: (cont'd)

Year Ended October 31, 2016:

Incentive Warrant Program

On December 31, 2015, the Company offered the holders of 4,000,000 share purchase warrants issued on June 10, 2015 (the "June Warrants") an incentive warrant to exercise their warrants early. Each June Warrant was exercisable to purchase one common share at $0.05 per share until June 10, 2016 or at $0.10 per share until June 10 2017. The Company would issue the holder of a June Warrant who exercises their June Warrant between January 4, 2016 and January 29, 2016 an incentive warrant for each June Warrant exercised. Each Incentive Warrant would entitle the holder to acquire an additional common share at $0.075 per share until June 10, 2016, and thereafter at $0.125 per share until June 10, 2020.

On January 29, 2016, the Company announced that incentive warrant program resulted in the exercise of 1,315,000 June Warrants for proceeds of $65,750. The Company issued the holders who exercised their June Warrants an incentive warrant and a common share for each June Warrant exercised. The fair value of the incentive warrants of $65,750 or $0.05 per warrant was allocated to directly to equity. The fair value was determined using the Black Scholes option valuation model with the following assumptions:

Risk-free interest rate	2.00%
Expected life of warrants	4.38 years
Annualized volatility	180%
Dividend rate	0%

Shares for Debt

On March 21, 2016, the Company issued 906,333 common shares at $0.075 per share to settle outstanding debts of $67,975. The shares were issued to seven creditors. Included in the totals were 566,333 common shares issued to related parties to settle debts totalling $42,475 (Note 10).

Private Placements

On April 29, 2016, the Company issued 2,693,666 common shares pursuant to the private placement of 2,693,666 units at $0.075 per unit for gross proceeds of $202,025. Each unit contained one common share and one warrant entitling the holder to purchase an additional common share at $0.125 until April 29, 2018.

In connection with the private placement, the Company paid finder's fees of $12,285, issued 163,800 finder's warrants. Each finder's warrant entitles the holder to purchase one unit with the same terms as the private placement units at $0.075 until April 29, 2018.

(Expressed in Canadian Dollars)

8. SHARE CAPITAL (cont'd)

b) Issued: (cont'd)

Year Ended October 31, 2016: (cont'd)

The fair value of the finders' warrants issued was calculated as $16,380 using the Black-Scholes Option Pricing Model using the weighted average assumptions below. Fair value is particularly impacted by stock price volatility, determined using historical price data for a term equivalent to the expected life of the warrant.

Risk-free interest rate	1%
Expected life of warrants	2 years
Annualized volatility	157%
Dividend rate	0%

On May 6, 2016, the Company issued 2,033,334 common shares pursuant to the private placement of 2,033,334 units at $0.075 per unit for gross proceeds of $152,500. Each unit contained one common share and one warrant entitling the holder to purchase an additional common share at $0.125 until May 6, 2018.

In connection with the private placement, the Company paid finder's fees of $6,475, issued 86,333 finder's warrants. Each finder's warrant entitles the holder to purchase one unit with the same terms as the private placement units at $0.075 until May 6, 2018.

The fair value of the finders' warrants issued was calculated as $8,633 using the Black-Scholes Option Pricing Model using the weighted average assumptions below. Fair value is particularly impacted by stock price volatility, determined using historical price data for a term equivalent to the expected life of the warrant.

Risk-free interest rate	1%
Expected life of warrants	2 years
Annualized volatility	150%
Dividend rate	0%

On September 9, 2016, the Company issued 1,050,000 common shares pursuant to the private placement of 1,050,000 units at $0.14 per unit for gross proceeds of $147,000. Each unit contained one common share and one-half of one share purchase warrant. Each full warrant entitled the holder to purchase an additional common share at $0.20 until September 9, 2018.

In connection with the private placement, the Company paid finder's fees of $1,260, issued 9,000 finder's warrants. Each finder's warrant entitles the holder to purchase one unit with the same terms as the private placement units at $0.14 until September 9, 2018.

The fair value of the finders' warrants issued was calculated as $720 using the Black-Scholes Option Pricing Model using the weighted average assumptions below. Fair value is particularly impacted by stock price volatility, determined using historical price data for a term equivalent to the expected life of the warrant.

Risk-free interest rate	1%
Expected life of warrants	2 years
Annualized volatility	142%
Dividend rate	0%

(Expressed in Canadian Dollars)

8. SHARE CAPITAL (cont'd)

b) Issued: (cont'd)

Year Ended October 31, 2016: (cont'd)

On October 20, 2016, the Company issued 1,325,000 common shares pursuant to the private placement of 1,325,000 units at $0.10 per unit for gross proceeds of $132,500. Each unit contained one common share and one-half of one share purchase warrant. Each full warrant entitled the holder to purchase an additional common share at $0.15 until October 20, 2018.

In connection with the private placement, the Company paid finder's fees of $4,200, issued 42,000 finder's warrants. Each finder's warrant entitles the holder to purchase one unit with the same terms as the private placement units at $0.10 until October 20, 2018.

The fair value of the finders' warrants issued was calculated as $4,200 using the Black-Scholes Option Pricing Model using the weighted average assumptions below. Fair value is particularly impacted by stock price volatility, determined using historical price data for a term equivalent to the expected life of the warrant.

Risk-free interest rate	0.94%
Expected life of warrants	2 years
Annualized volatility	147%
Dividend rate	0%

On October 26, 2016, the Company issued 2,175,000 common shares pursuant to the private placement of 2,175,000 units at $0.10 per unit for gross proceeds of $217,500. Each unit contained one common share and one-half of one share purchase warrant. Each full warrant entitled the holder to purchase an additional common share at $0.15 until October 26, 2018.

In connection with the private placement, the Company paid finder's fees of $6,432, issued 64,320 finder's warrants. Each finder's warrant entitles the holder to purchase one unit with the same terms as the private placement units at $0.10 until October 26, 2018.

The fair value of the finders' warrants issued was calculated as $6,432 using the Black-Scholes Option Pricing Model using the weighted average assumptions below. Fair value is particularly impacted by stock price volatility, determined using historical price data for a term equivalent to the expected life of the warrant.

Risk-free interest rate	0.94%
Expected life of warrants	2 years
Annualized volatility	147%
Dividend rate	0%

All the share purchase warrants issued in conjunction with the above private placements, including those issued as finders' fees, are subject to acceleration clauses, which will cause the warrants, if unexercised, to expire on the date which is 30 days after the date that the volume-weighted average trading price of the Company's common shares on the TSXV exceeds $0.25 per share for certain warrants and $0.35 per share for others over a period of ten consecutive trading days.

(Expressed in Canadian Dollars)

8. SHARE CAPITAL (cont'd)

b) Issued: (cont'd)

Year Ended October 31, 2016: (cont'd)

Gemini – Prospect Fee

On June 6, 2016, the Company issued 300,000 common shares at a value of $28,500 to Nevada Sunrise as a prospect fee on the Gemini Lithium Project (Note 6).

Warrants Exercised

During the year ended October 31, 2016, the Company issued 3,300,000 common shares at $0.05 per share for proceeds of $165,000 pursuant to the exercise of 3,300,000 share purchase warrants.

During the year ended October 31, 2016, the Company issued 100,000 common shares at $0.075 per share for proceeds of $7,500 pursuant to the exercise of 100,000 share purchase warrants.

Finder's Warrants Exercised

During the year ended October 31, 2016, the Company issued 8,400 common shares and 8,400 warrants exercisable at $0.125 per share until April 29, 2018 pursuant to the exercise of 8,400 finder's warrants at $0.075 for proceeds of $630.

c) Stock Options:

The Company has a Stock Option Plan ("the Plan") under which it is authorized to grant options to directors, officers, consultants or employees of the Company. The number of options that may be granted under the Plan is limited to 10% of the number of issued and outstanding common shares of the Company at the date of grant. The exercise price of options granted under the Plan may not be less than the market value of the Company's common shares on the date of grant. Options granted under the Plan have a maximum life of five years and vest on the date of grant, over a period determined by management, or over a period mandated by TSX-V policy.

A summary of stock option activity for the six months ended April 30, 2017 and for the year ended October 31, 2016 is as follows:

	Number of Options	Weighted Average Exercise Price
Outstanding options, October 31, 2015	1,400,000	$0.10
Issued	900,000	$0.10
Outstanding options, October 31, 2016	2,300,000	$0.10
Issued	1,150,000	$0.12
Outstanding options, April 30, 2017	3,450,000	$0.11

(Expressed in Canadian Dollars)

8. SHARE CAPITAL (cont'd)

Stock Options: (cont'd)

On June 27, 2016, the Company granted 900,000 stock options to directors, officers and consultants of the Company. The options entitle the holders to purchase one common share for each option held at $0.10 until June 27, 2021. The fair value of the stock options of $81,000 or $0.09 per option was determined using the Black Scholes option valuation model.

On January 16, 2017, the Company granted 950,000 stock options to directors, officers and consultants of the Company. The options entitle the holders to purchase one common share for each option held at $0.13 until January 16, 2022. The fair value of the stock options of $114,000 or $0.12 per option was determined using the Black Scholes option valuation model.

On April 28, 2017, the Company granted 200,000 stock options to a director of the Company. The options entitle the holder to purchase one common share for each option held at $0.10 until April 28, 2022. The fair value of the stock options of $16,000 or $0.08 per option was determined using the Black Scholes option valuation model.

Share-based compensation expense was determined using the following weighted average assumptions:

	Six months ended April 30, 2017	Year ended October 31, 2016
Risk-free interest rate	1.39%	1.38%
Expected life of options	5 years	5 years
Annualized volatility	169%	171%
Dividend rate	0%	0%
Forfeiture rate	0%	0%
Share price on grant date	$ 0.12	$ 0.095

At April 30, 2017, there were 3,450,000 stock options outstanding entitling the holders thereof the right to purchase one common share for each option held as follows:

Number of options outstanding and exercisable	Exercise Price	Expiry Date
1,400,000	$0.10	June 23, 2020
900,000	$0.10	June 27, 2021
950,000	$0.13	January 16, 2022
200,000	$0.10	April 28, 2022
3,450,000		

At April 30, 2017, the stock options had a weighted average remaining life of 3.95 years.
